Asset Bible

Every asset the game could use, in one place, for the build weekend. Generated from the game's own files by `npm run asset-bible` (scripts/build-asset-bible.mjs), so it follows the game: re-run it after any art lands.

HAVE · final art on disk | PLACEHOLDER · on disk, to be replaced | MISSING · nothing on disk

CODE · drawn or synthesised in code

401 assets: **98** have · **77** placeholder · **131** missing · **95** code. Faded tiles marked "opt" are optional (a feeling the NPC never shows in a battle, or art the game does not need yet).

THE LOOK, IN THREE RULES

1. White on black, 1-bit pixel art and dither; hard edges, no soft gradients, no glows. 2. The screen is 390 × 844; draw at 2× (780 × 1688) unless a row says otherwise. 3. Replace, don't rename: drop real art at the listed path. Sizes and templates: `docs/ASSET_SIZES.md`, `docs/ART_GUIDE.md`, `docs/CHARACTER_ART.md`, `docs/BATTLE_ART.pdf`.

NPC character states

Each NPC: 192 × 192, 1-bit look (black pixel art on white), GIF or PNG. Per docs/CHARACTER_ART.md. Talk and wait pieces for a feeling the NPC never shows in a battle are marked optional.
